SUMMARY

Economist with strong quantitative background and over eight years of experience applying data analysis, economic modeling, and business intelligence in corporate and institutional settings. Currently a data science analyst at BRB Bank, focused on customer channel strategy. Master's candidate in Finance at FGV, researching the macroeconomic and institutional impacts of bitdollar adoption — a scenario in which the US dollar and Bitcoin coexist as sovereign stores of value.

PROFESSIONAL EXPERIENCE

Analyst — Data Science & Channel Strategy

May 2022 – Present

BRB Bank · Brasília, DF

Development of analytical solutions in Power BI, DAX, SQL, and Python to support strategic decisions on customer service channels. Data modeling, executive dashboard design, and predictive analytics using Python (pandas, scikit-learn, matplotlib) and R. Includes prior work on data extraction and analysis to support the bank's credit recovery strategy.
